PROFILE
I get a thrill out of wow-ing my clients and team members with pixel perfect responsive and interactive UX design that is intuitive and easy for end users with even basic abilities. I am driven to mock up, prototype, and hand-code modern websites or applications that not only look great but increase ROI and help drive revenue. I have a proven ability to evaluate, learn and master new technologies. I am a high energy team player who has been effective in building team moral with a positive attitude and great enthusiasm.
